

# DS 3

## Turbo-emulsifier

The Turbo-emulsifier Mixer DS 3 can mix, homogenize, emulsify and disintegrate different types of substance. It can process up to 10 liters of product. Its motor, with a power of 600 watts, can reach up to 12.500 nominal revolutions per minute. All immersed parts are made of stainless steel or FDA approved materials.

The DS-3 turbo-emulsifier is equipped with a set of 4 steel heads for mixing, emulsifying, disintegrating and homogenizing.
