

MS 4/7

Capsule loader

The MS 4/7 capsule orientator serves to position and to evenly align the hard gelatin capsules on specific plates to prepare them for capsule-filling machines MS 6 N and 6 AUT.

A special carriage with alternate shifting makes it possible to fill both the 150-hole plates and the 300-hole ones, all while taking up very little space on the worktable.

The machine, by means of a simple grid change, is able to process all capsule sizes from 000 to 5, in addition to the special DB Caps. It is very easy to clean and requires no maintenance.

Accessories: capsule reducers, hoppers for pellets, tablets, etc.

| QUANTITY IN LOTS | PRODUCTION h | CAPSULE SIZE | DIMENSIONS LXWXH cm | WEIGHT kg |
|------------------|--------------|----------------------------------|---------------------|-----------|
| 150/300 | 1300 | 000/5 DB caps AAA-AA-AB-C-D-E | 37x50x52 | 40 |
